More on marking:

Every item you mark does not need a warning label, these are to warn people that “everything” may be marked; no-one should be sure what you’ve marked, and what you haven’t.

For paintings on canvas, mark only the edges and frame. Do Not mark the back of a canvas. If in doubt, test a small area of the item you wish to mark.

Don't forget to register by going to www.alphadot.it
Registration is FREE.

Please keep us updated if you move house, or
change your contact details.

Marking your Home/Office - Stuff

Marking Advice

Decide which items to mark before starting the job. Typically, you can mark up to about 40 items with one pot of dots. Items easily sold for cash should be top of your list such as your DVD player or laptop, antiques, etc. ending up with your garden equipment if you have some spare dots left in the pot - leave the dirty stuff until last.

Clean all areas to be marked. ***This guide to locations is useful, but by no means definitive***, please use your imagination, and don't apply the Dots to surfaces which you can see, and might spoil the appearance of your stuff.

Typically, you can mark up to about 40 items with one pack.

Shake the pot vigorously before use. You will see the tiny dots like dark particles in the creamy glue, shake until they are well spread. The glue dries clear.

Practise first on a piece of white paper. The glue is water based, so you can wipe off any surplus with a damp cloth, but once dried, the mark is permanent.

Apply warning labels in highly visible areas (the labels are not easily removed, so make sure you're happy with the position(s) that you choose)
